

The Community Resource Center

A One Stop Shop to Meet Your Needs in Your Neighborhood!!

Shiloh Community Housing, Inc. will expand program services and meet the urgent needs of our community through the development of a Community Resource Center. The goal of the Community Resource Center is to develop, operate, and maintain a multi-purpose venue that generates revenue and safeguards long-term organizational sustainability.

Meeting the community's needs

Shiloh Community Housing, Inc. vision is to remove the barriers to safe, affordable housing such as age, income, sustainable employment; lack of education or under-education; and lack of training/skills which would prevent a person from obtaining sustainability and acquiring permanent housing.

The Resource Center will provide:

- Offices for lease; with the vision that agencies and service providers will operate in a centralized location.
- An Internet café that will make high-speed broadband services available for those that can't afford it; will also offer access to printer, copier, and fax machine.
- A soup/sandwich shop and food options for users of the Internet Café and other patrons.
- Several conference spaces will be available for community/business meetings; these can also serve as community gathering places.
- A wellness center will provide access to physical and mental health services and training for entrepreneurs, job referrals, and money management (from budgeting to wealth building).
- A furniture bank where donated items will be distributed.
- A certified kitchen that can be rented for meal preparation by portable food service businesses.
